

## **ISCO MODEL 6712 SOFTWARE UPDATES**

**REVISION 3.02.0007**

**Software Release Date: 7/21/2017**

### **Corrections:**

1. *10361, 10518* Dual Sampler mode will now work using SMS messages if the message is an ENABLE message and the receiver is WAIT(ing) FOR PHONE CALL. Note: Dual Sampler mode will not work if the sampler sending the ENABLE message is using a UMT modem.
2. *10451* Modems will now be powered when the sampler is off if MODEM CONNECTOR POWER ALWAYS ON is selected.
3. *10786* For PERIODIC SERIAL OUTPUT strings, the CRC value will now be correct. FL (flowrate) and VO (volume) values for SDI-12 Sondes with LEVEL readings and level-to-flow conversions using that LEVEL reading will now be properly included in the strings.

**Enhancements:** SMS messages will now include a two-digit count that indicates that it is a new message. This should help to debug issues with multiple texts. If it is a service provider issue, the count will be the same. If it is a 6712 issue, the count will increment.

### **Changes:**

1. SMS messages sent to email addresses are not supported by the LTE modem.
2. RTT and Voice modems are no longer supported.
